

Nissan Consult 3 Professional Diagnostic Tool

Languages: English, Finnish, French, German, Russian, Greek, Italian, Japanese, Spanish, Chinese(Traditional), Chinese(simplified)

Special Function: Now consult 3 can do GTR, but it needs customers have GTR Card.

Nissan Consult 3 VI Registert Password: nissanconsult3

OS Requirement: Windows XP (SP2) or Windows XP (SP3).

Functions:

1. Swift Diagnosis and Swift Repairs Through Automated Operations

The selection of CAN type as well as the identification of malfunction locations are completely automated, allowing CAN diagnosis to be done 17 times faster than previous method where the diagnostics system needed to be supplemented by the service manuals. Repairs involving reprogramming of the in-vehicle computer can be completed 1.5 to 2.5 times faster with the new system.

2. Automated Self-Diagnostics

The system is able to perform accurate diagnosis without having to rely on the diagnostic skills of technical staff at the dealership. Increased efficiency in operations based on wireless technology.

With wireless vehicle communication interface, it is possible to check the condition of the vehicle from either inside or outside the vehicle. At dealerships in Japan, it is possible to access the Nissan network to retrieve both the maintenance technology data related to the diagnosis results and spot adequate information on service manual. The dealerships are also able to access their service database and refer to the vehicle's maintenance history on the laptop PC.

3. Capable of Handling Multiple Complex Defects

The diagnostics tool is equipped with various functions including simultaneous self-diagnosis of an entire system, simultaneous data monitor for multiple systems, data recorder, and oscilloscope capability.

4. Enhanced Data Management with Improved Laptop PC

New features such as adoption of color-screen and large-screen monitor allow viewing of large amounts of information altogether for enhanced data management

5. Map Data Update Function for Hard-Disk Navigation System

Through high-speed data update system, it is possible to update map data in approximately 20 minutes with the new CARWINGS navigation system (hard-disk) equipped in the all-new Skyline and other future products.

CONSULT:Computerized On-Board System Universal Tester.

CONSULT introduced in 1989,
